STRUCTURE

Our structures are carefully cut and assembled at our Canadian manufacture. We use the traditional mortise and tenon method of joining, which is then glued and braced to ensure unparalleled stability. Our approach involves careful selection of quality wood combining Baltic wood with solid wood, to create a product of exceptional strength.

MECHANISM

High-end, state-of-the-art Leggett & Platt mechanism and reclining motor. Offers a greater amplitude of opening and weight capacity up to 350 lb.

SEATING

We use specially designed hardened steel springs to prevent unwanted sagging. These springs are carefully installed with Teflon coated fasteners, ensuring quiet operation without annoying squealing. The springs are also installed in such a way as to create a domed effect which ensures superior comfort.

FILLING

Seat foam composed of 4" thick high density foam (density 2.05 lbs/ ft3) and on top 1" of hybrid memory foam (density 3 lbs/ft3); plus 2" 1/2 thick back foam (density 1.75 lb/ft3) covered with dense synthetic fiber. A combination that offers unparalleled comfort and durability. Our upholstery doesn't stop at the seat. We also padded the outside of the back as well as the sides of the arms for a perfect finished product of exceptional strength.

WARRANTY

Limited lifetime warranty applicable to the wooden frame, springs, coils, straps and mechanism / **5 years** on foam and fiber-padded components / **3 years** on the reclining motor / **2 years** on the covering / **1 year** on electronic components, labor and fabrication.
