MODULAR SOFA
Dropship Collection

Jaymar

Conçu et fabriqué fièrement au Canada
Proudly designed and made in Canada

Nos produits sont fabriqués à la main et des variations mineures peuvent survenir.
Our product is hand-made and minor variations can occur.

1. Durable Construction

Solid Wood Frame, Lifetime Warranty

NUA is built around a robust solid wood frame, designed to offer long-term stability, durability, and peace of mind.

No-Sag Spring Platform

The seating platform is mounted with No-Sag springs, providing consistent support and enhanced durability.

Low Profile Construction

Its low, contemporary design integrates easily into modern spaces, creating a generous, lounge-like, and inviting silhouette.

Jaymar Craftsmanship

NUA is part of the manufacturing heritage of Jaymar, a Quebec company founded in 1956 and renowned for its high-end upholstered furniture, design, customization, quality, and durability.

2. Modularity and Flexibility

3 Essential Modules, a Multitude of Configurations

The NUA collection is composed of three main modules that allow you to create, transform, and adapt the sofa to suit your space and needs:

- Corner seat / right or left armrest
- Armless seat
- Ottoman

Mix & Match Configuration

The modules can be freely combined to create a compact sofa, chaise lounge, sectional, family lounge, or a more open configuration.

Fully Upholstered Modules

Each module is upholstered on all sides, allowing it to be used both in combination and individually, without compromising aesthetics.

Concealed Attachment System

A hidden attachment system under the modules, featuring German-engineered LUSCH crocodile-style fasteners, keeps the elements securely in place while maintaining a clean, streamlined look.

3. Generous Comfort

22" Seat Depth

The 22" seat depth provides an enveloping lounge feel, ideal for relaxing, stretching out, watching a show, or sharing time with family.

Padded Seat Frame and Arms

The seat frame and arms are padded for added comfort, even in contact areas.

Cushions with zippered covers

The cushion covers have zippers for easy care and to extend the product's lifespan.

4. Ethically and responsibly sourced filling

No animal products in the filling

NUA uses neither feathers nor down in its cushions. Comfort is achieved through high-performance synthetic materials, designed to offer a responsible, comfortable, and sustainable alternative.

Cluster Fiber Back Cushion

The back cushion is filled with a 3.2 lb pocket of cluster fiber, a down alternative designed to provide consistent comfort and reliable support. Its hollow, siliconized polyester fiber is hypoallergenic, while its continuous filament construction helps prevent clumping.

The cluster fiber creates a plump, supple, and refined feel, with good shape recovery and a soft to medium-firm comfort level.

Multi-Layered Seat for Lasting Comfort

The seat is composed of several complementary layers:

- Top Layer: 1 1/4" Hybrid Foam, 3 lb Density
- Middle Layer: 1 1/2" High-Resilience Foam, 23 Compression Level
- Bottom Layer: 2 1/4" Firm High-Resilience Foam, 29 Compression Level

This construction is designed to combine a plush feel, progressive support, and durability.

5. Easy-Care Performance Fabrics

Performance Fabric Upholstery

NUA is available in a selection of performance fabrics designed to withstand the rigors of everyday life: impromptu meals, movie nights, children, pets, working from home, and relaxing moments.

Water-Repellent and Stain-Repellent Technology

The selected fabrics are treated to make everyday care easier. Liquids bead more readily on the surface, allowing for quick and simple cleaning.

PFAS-free* CO finish

The selected fabrics use a CO finish, 100% fluorocarbon-free, and therefore PFAS-free, reflecting a more environmentally conscious approach.

Simplified care

For compatible fabrics, care is simple: just blot with a dry cloth, then clean with water and a mild detergent. More stubborn stains can be treated with light pressure using a soft-bristled brush and a mild detergent. The Jaymar fabric guide also specifies the different cleaning instructions depending on the fabric chosen.

6. Responsible details and brand signature

Recycled leather production label

The NUA label is made from Jaymar's premium leather offcuts, giving a second life to even the smallest pieces of material.

A signature detail

This label becomes a distinctive element of the brand: discreet, premium, and consistent with the idea of valuing materials down to the smallest detail.
